The Function and Description of Trommel Screen:

Trommel screen is suitable for classifying powdery materials with outstanding screening effect. The screen mesh is 60-200; power is 0.75-3kw and output is 500-1500kg/h.

The Performance Characteristics of Trommel Screen:

1. The angle of inclination of installation is small and the machine is not very easy to be blocked.

2. Drum screen covers a small size.

3. Low noise and little powder dust pollution.
Characteristics:

Charge Amount: 50-150mm
Reference Power: 12-150t/h
Application Range: His machine can be used in the grading of powder material, which this the 60-200 mesh screener with good sieving effectiveness.

Features

1. Stable operation
2. High screening efficiency
3. Big output
4. Convenient installation

Pre-sale services: enthusiasm

We provide you with the prophase plan, process flow design and manufacturer equipment according to your special demand.

Sale services: servant

Send technicians to the jobsite for guiding the installation and adjustment, training operators and finishing the check and accept together with you.

After-sale services: faithfulness

To establish long term friendship, we will regularly pay return visit to customers. Supplying technique, building design, instruction, installation.
